Portraits, Functions
& Special Events!

Families, Couples
& even Pets!

My name is Katie Cann and I have been taking photos for over ten years. I love that I get to meet parents and parents-to-be who are so excited and happy about their lives.

I try to capture such brief, special moments that it is thrilling to imagine you and your children looking into the past through my work.

Now that I am a mother, I find that every day I have a new perspective on every photo I take.

- Katie Cann

I am currently available in the Katherine (NT) area. If you are interested in having portraits of your family (including pets), partner, solo or your group of friends or work colleagues, please contact me to discuss your needs.

Session Information

Most of my portrait sessions are done conveniently in your home or at a location that is special to you.

When possible I prefer to use natural light, both for it's beauty and because it provides a more relaxed environment. During the summer months many of my clients like to do a mixture of indoor and outdoor photos.

I am happy to make arrangements for this as I love variety and change within a session.

I do not put any limit on poses or outfit changes. For maternity sessions I suggest having three or four options ready, if not more. For babies and children, I only suggest a couple of changes, entirely on your child's mood and temperament.

Each session is different. I enjoy collaborating with my clients to find and create something memorable.

For maternity portraits, we experiment with poses, settings, clothing, backdrops, artistic techniques, and light, to capture a unique variety of images of your pregnancy.

For baby portraits, I like to see the child interact with his or her family and in his or her home.

I do black and white photography with the occasional splash of colour when the photo suggests it.
